EDUCATION

University of Washington

Seattle, WA

Bachelor of Science in Informatics | Bachelor of Arts in Political Science

Sept. 2023 – June 2027

- Relevant Coursework: Data Structures and Algorithms, Client-Side Development, Design Methods, Product and Information Systems Management

EXPERIENCE

Product Designer

October 2025 – Present

Reely Connected – University of Washington

Seattle, WA

- Designed an offline card game to teach tech literacy to older adults, improving accessibility through intergenerational play
- Conducted 10+ user interviews and playtests to identify usability barriers and refine game instructions
- Built interactive prototypes in Figma, applying feedback to enhance clarity and visual hierarchy
- Delivered final demo and pitch deck highlighting inclusive design and engagement outcomes

Lead UX Designer

July 2025 – August 2025

ActUP – University of Washington

Seattle, WA

- Designed and developed a civic-engagement platform fostering community among young volunteers through interactive features
- Built responsive React pages and Firebase image storage while ensuring accessible, aesthetic CSS design
- Created brand identity, wireframes, and color palette in Figma to establish a cohesive, youth-oriented interface
- Prototyped spinning task wheel, journals, and public feeds to gamify volunteering and boost engagement

FIG Leader

August 2024 – December 2024

University of Washington First Year Programs

Seattle, WA

- Designed and facilitated a 10-week onboarding program for 25+ new students, strengthening stakeholder engagement and presentation skills
- Led interactive lessons and activities, achieving over 90% participation and improving new student engagement
- Collaborated with academic advisers to align lesson content with university resources and student success goals

PROJECTS

Sea Here | *TypeScript, React, Firebase, Figma*

June 2025 – August 2025

- Developed a full-stack web application using with Flask serving a REST API with React as the frontend
- Designed high-fidelity Figma wireframes & prototypes with Seattle Aquarium's color palette
- Crafted detailed specifications and development roadmap to align stakeholders and streamline implementation

Ginger | *Python, React, Flask, Figma*

September 2025 – November 2025

- Conceptualized a Strava-and-Pinterest-style app for cooking, growing to 50+ beta posts in two weeks
- Designed responsive, mobile-first UI in Figma with bold color accents and visual appeal
- Built dynamic recipe feed and profile pages in React using reusable hooks and modular CSS
- Integrated Firebase backend with front-end auth and live recipe sharing features
